Award Title: Testing the Validity of Radiographic Comparisons in Positive Identifications	
Award Description: The proposed project will evaluate and quantify the degree of uniqueness exhibited by various anatomical structures visible in radiographs, test the accuracy and reliability of currently used methods, and determine error rates. This research will help validate skeletal comparison methods and expand the ability of forensic pathologists and anthropologists to positively identify previously unidentified remains, especially in cases of incomplete skeletal recovery. ca/ncf	
Awardee Name: North Carolina State University	Award Number: 2010-DN-BX-K214
Solicitation Title: NIJ FY 10 Fundamental Research to Improve Understanding of the Accuracy, Reliability, and Measurement Validity of Forensic Science Disciplines	Fiscal Year: 2010
Amount: \$284,763.00	Earmark: No
Recovery Act: No	State/Territory: NC
County: Wake	Congressional District: 13
Award Status: Open
